SKILLS

Languages & Core
JAVASCRIPT, TYPESCRIPT, NODE.JS

Frontend
REACT, NEXT.JS, VUE.JS, TAILWIND CSS, SCSS, STYLED-COMPONENTS

Backend & Databases
EXPRESS, POSTGRESQL, MONGODB, PRISMA, DJANGO

APIs & Cloud
REST API,SWAGGER/OPEN API, GRAPHQL, GCP, GOOGLE CLOUD, DOCKER

Tools & Methodologies
GIT, CI/CD (GITLAB), JEST, CONTENTFUL, BUILDER.IO, STRIPE/ADYEN/CHARGEBEE, STORYBOOK, AGILE/SCRUM

ABOUT ME

I'm Senior JavaScript Full Stack Developer / Contractor / Freelancer with 10+ years of experience in building web applications.
I help companies around the world to design and implement their software solutions
Drop me a message if you think my expertise could help your organization!

WORK EXPERIENCE

SENIOR FULL-STACK NEXT.JS ENGINEER
Jun 2023 - Mar 2025
Everyman Health - Zurich Switzerland

Project: Everyman healthcare platform
As the core developer at Everyman, I significantly improved the platform by implementing key features and optimizing workflows:

- Stripe Integration: Enhanced the payment system by improving Stripe integration and adding recurring subscriptions, **resulting in a 50% revenue increase** in the first month and a **consistent 15-20% monthly user growth**.
- Survey User Flow: Optimized the survey user experience by implementing state storage, handling edge cases, and integrating custom analytics tracking, **leading to a 40% increase in survey retention** and completion rates, while improving reporting capabilities.
- Back Office Platform: Upgraded the back office platform with custom flows for doctors and streamlined the pharmacy's fulfillment process:
  - Reduced the time for doctors to review patient data by **50% through an easy-to-read dat**a presentation.
  - Decreased pharmacy **order processing time by 80%, from 15 minutes to just 3 minutes** per order.

These improvements enhanced platform functionality, optimized workflows, and contributed to measurable business impact.

Technologies & Tools: Next.js, Typescript, React.js, Tailwind CSS, BuilderIO, Django, Prisma, Google Cloud Platform (GCP), GitHub Copilot, Docker, PostgreSQL

SENIOR FULL STACK REACT/NEXTJS ENGINEER
Feb 2023 - Jun 2025
Conway & Co - Amsterdam Area

Project: E-commerce platform for client Fit For Me
Worked on developing and optimizing the e-commerce integration for the Fit For Me platform, enhancing the user experience and ensuring smooth payment processing.

- Developed the **e-commerce platform integration** using Next.js and React, ensuring fast, responsive, and seamless user interactions.
- Implemented a **custom UI** for the shopping cart and checkout process, integrating Adyen payment processing for secure and efficient transactions.
- Built **reusable UI components** for the blog section, ensuring a consistent and maintainable design system across the website.

Technologies & Tools: Next.js, React, Typescript, Adyen Payment Gateway, Tailwind CSS, PostgreSQL, Prisma, BuilderIO, Git

MASTER'S DEGREE
ELECTRONIC AND COMMUNICATION
INTEGRATED SYSTEMS
Faculty Of Electrical Engineering And Computer Science, Transilvania University Of Brașov
2012 – 2014 | UNITBV

BACHELOR'S DEGREE
TELECOMMUNICATIONS
TECHNOLOGIES AND SYSTEMS
Faculty Of Electrical Engineering And Computer Science, Transilvania University Of Brașov
2008 – 2012 | UNITBV

SOFTWARE ENGINEER CONSULTANT
Aug 2019 - Feb 2023
PassionatePeople - Amsterdam Area

Passionate People is a software consultancy company focused on leading and developing world-class web applications.
Being part of this team gives me the opportunity to support clients across the Netherlands in growing their businesses—by joining their teams and delivering high-quality solutions.

SENIOR REACTJS/NEXTJS JAVASCRIPT ENGINEER
Aug 2021 - Feb 2023
DPG Media | interim via PassionatePeople

Project: Modular Platform for Media Brand Onboarding – DPG Media Group
DPG Media Group, a Belgian media company active in the Netherlands , was facing challenges with onboarding new media brands and managing existing websites efficiently.

- **Reduced onboarding time by 30**% by designing and implementing a modular and distributed platform for streamlined brand integration.
- **Improved overall website performance by 50%** through the implementation of a static site generation solution using modern frameworks.
- **Boosted site rankings by 25%** by applying comprehensive SEO best practices across all media brand websites.
- Worked collaboratively with developers and product owners to deliver scalable, high-performance solutions in an Agile environment.

Technologies & Tools: React.js, Next.js, Typescript, Tailwind CSS, Microservices Architecture, Swagger/OpenAPI Specification, Unit Testing (Jest)

SENIOR JAVASCRIPT FRONTEND DEVELOPER
Jan 2021 - Aug 2021
KPN | interim via PassionatePeople

Project: Web Component Redesign & Personalization – Dutch Telecom Company
Redesigned outdated web components and layouts to enable seamless feature integration and support a new personalization system..

- Redesigned legacy web layouts, **reducing content update and personalization time by 30%,** improving maintainability and flexibility for content teams.
- Integrated chat support features into the troubleshooting section, r**esulting in a 40% decrease in customer care calls within one month.**
- Collaborated closely with cross-functional teams in an Agile/Scrum environment to deliver scalable and user-focused solutions.

Technologies & Tools: Vue.js, AngularJS, SCSS/SASS, PatternLab, jQuery, Bootstrap, Git/GitLab, Jira, Scrum, Agile

SENIOR BACKEND NODE JS DEVELOPER
Aug 2020 - Nov 2020
IceMobile | interim via PassionatePeople

Project: Data Aggregation & Performance Optimization – Russian Retailer
The client, a major Russian retailer, faced mobile app stability issues due to data inconsistency across multiple systems.

- Eliminated data-related errors by designing a data aggregation layer to process and enrich inputs for the mobile application.
- Improved app performance by r**educing average response time by 25%, resulting in a 10% increase** in downloads through a new caching layer.

Technologies & Tools: Node.js, Express.js, Swagger/OpenAPI Specification, Unit Testing (Jest)

SENIOR JAVASCRIPT FULL-STACK DEVELOPER
Rodeo - Make it Flow | interim via PassionatePeople

Sep 2019 - Aug 2020

Project: Scalable Project Management Platform – SaaS Client
The client, mid-development of a subscription-based all-in-one project management platform, was struggling with scalability, slow development cycles, release bottlenecks, and recurring bugs in critical features like PDF generation and subscription handling.

- Accelerated development by **50% by building a reusable UI component library,** ensuring design consistency and faster implementation.
- Reduced **PDF generation time by 80% with a scalable microservice** for handling document requests.
- • Reduced the number of **calculated incorrectly subscriptions to 0** by researching and integrating to a third party service which was specialised in subscription models (Chargebee).
- Decreased time-to-market **from 2 weeks to 1 hour** by implementing a fully automated CI/CD release process accessible to all team members.
- **Improved SLA to 99.9% and boosted average request speed by 5%** by migrating storage and database to Google Cloud solutions.

Technologies & Tools: React.js (Material UI), React-PDF, FeathersJS, Styled-components, Storybook, Atomic Design, GitLab CI/CD, Google Cloud (App Engine), MongoDB Atlas, Microservices, OpenAPI/Swagger, Unit Testing (Jest), Chargebee SDK

SENIOR FULL-STACK DEVELOPER
Fonterm Ventures B.V. - Amsterdam area

Sep 2018 - Aug 2019

Project: Content Delivery Platform – Blu (E-cigarette Brand)
The client, Blu (e-cigarette brand), faced major delays in publishing and updating content due to a slow and inefficient CMS.

- Reduced time-to-market **from 2 days to 3 minutes** by designing an automated content delivery pipeline using Contentful's headless CMS and Netlify.
- Built a scalable content model and a **reusable UI component librar**y, enabling content editors to easily create customized experiences using a modular, LEGO-like system.

Technologies & Tools: React.js, Styled-components, Storybook, Typescript, Gatsby, GraphQL, Contentful CMS & SDK, Netlify API, CI/CD, Unit Testing (Jest)

SENIOR FRONTEND DEVELOPER
SuitSupply - Amsterdam area

Jan 2015 - Sep 2018

Project: Custom Garment Builder – Global Luxury Suit Manufacturer
The client aimed to replicate the personalized in-store tailoring experience online, allowing customers to design custom suits from home.

- Increased **revenue by 15% by developing** a modular web interface usable both by in-store tailors and online customers via the e-commerce platform.
- Boosted user **engagement by 50% by engineering a dynamic rendering system t**o visually display hundreds of custom garment combinations in real-time.

Technologies & Tools: Responsive Design, Handlebars, SCSS, Node.js, Hapi.js, REST API, Cloudinary (Image Delivery)
